EST 1980

2025 DECORATIVE GLASS BROCHURE

Glass Manufactures, specialising in etched glass,
enamelled glass, stained glass & bespoke glass
restoration.

INTRODUCTION.

Knowsley Art Glass is a small family run business, established in 1980 based in Huyton, Liverpool.

Over the last four decades we have grown as a business and gained a lot of experience in our field, manufacturing all of our glass products in house, with a lot of our standard etched designs featured up and down the UK.

We offer a range of services including our standard stock of etched & coloured glass, stained glass, and the restoration of broken bespoke glass panels.

We have made a favourable name for ourselves in the glass industry along the way, working alongside not only respected historic conservators but we have also been featured in film & television, such as Channel 4's "Peter Snow's Great Rail Restoration" & the BBC's period drama "Peaky Blinders".

GLASS INDEX ETCHED GLASS OPTIONS.

Our most cost effective option with plenty of designs to choose from.

- Page One-Two: Victorian Repeat Patterns.
- Page Three-Four: Fanlights/House Numbers.
- Page Five-Six: Central Glass Designs.
- Page Seven-Nine: Wide panel Glass Designs.

DOUBLE ETCHED GLASS OPTIONS.

Similar to Satin Glass and used for privacy, often in bathrooms.

- Page Ten: Victorian Repeat Patterns.
- Page Eleven: Central Glass Designs.

COLOURED & ETCHED GLASS OPTIONS.

Using fired enamel we fire colour into the glass & then etch it

- Page Twelve-Thirteen: Victorian Repeat Patterns.
- Page Fourteen: Central Glass Designs.

NINE PANEL GLASS PACK OPTIONS.

a wide range of Glass borders, corners & center designs used for windows & doors.

- Page Sixteen: Center Panel Designs
- Page Seventeen-Nineteen: Corner Panel Designs
- Page Twenty-Twenty two: Border Panel Designs.

DOUBLE GLAZING

all our glass can be made into double glazed units, we also do clear glass double glazed units & Etched Units.

- Page Twenty Three - Twenty Four: Information.
- Page Twenty Five: Prices.

BESPOKE GLASS RESTORATION.

We also offer a bespoke glass restoration service. We can recreate broken glass panel to match original features.

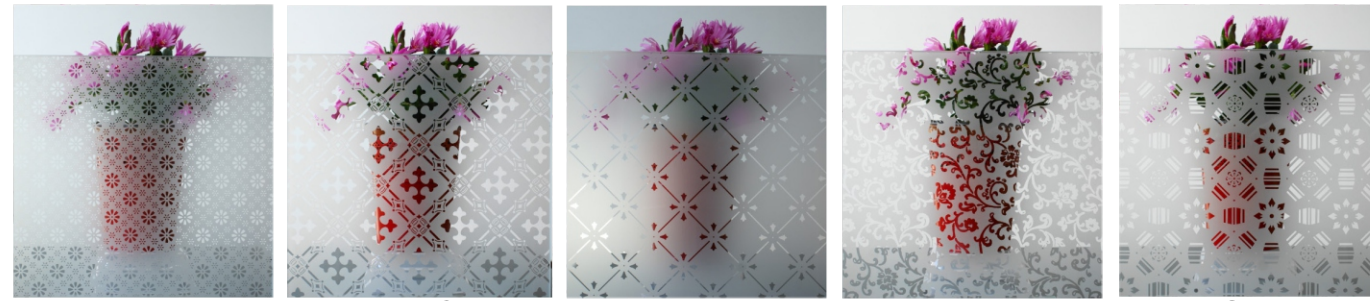

- Page Twenty Six: Bespoke Restoration.

VICTORIAN ETCHED GLASS REPEAT PATTERNS

The Victorian repeat pattern etched glass is made in 1220x1070mm stock sheets, or may be supplied cut to your sizes and toughened, to comply with current safety regulations.

Standard glass thickness is 4mm.

We can also make your glass into double glazed units.

BRILLIANT CUT GLORY STARS

THE DESIGNS BELOW ARE AVAILABLE IN RED/GREEN/BLUE/AMBER/CLEAR/ETCHED

Information About Brilliant Cut Corners- Brilliant cutting is an extraordinary skilled and artistic process, an age-old process passed down through many generations via apprenticeships. The process creates designs on glass and mirror and is all done by hand. These unique brilliant cut corners are all individually hand made out of,ashed glass using Victorian traditional methods. Often seen as corners in Victorian sash windows and doors.

DOUBLE GLAZING.

This page is here to help you with understanding double glazed units, otherwise known as insulated glazing.

There are lots of different options for double glazing to choose from depending on the customers requirements.

You will need to inform us the following-

What thickness unit they require.

What Spacer Bar they wish to use.

If the unit is to be Gas Filled

What type of glass they wish to use (example low e)

Below we will supply some useful instructive advice on how to acquire the above information for your own double glazed unit.

First, some information-

Gas or Air Filled?

A double glazed unit consists of two glass window panes which is separated by a vacuum, either air filled or gas filled. What's the difference between air filled & gas filled? Air filled is the cheaper option, and do provide a certain level of energy efficiency & noise reduction. Gas filled is a better investment for long-term energy efficiency & Performance.

Spacer Bars.

Spacer bar, otherwise known as a profile; is the continuous hollow frame which separates the two glass panes within a double glazed unit. The bar is bonded to the glass panes via a primary & secondary seal, which in turn creates an airtight cavity which can be filled with air or gas. The spacer bar itself is filled with a desiccant to absorb any residual moisture within the cavity and thus prevent condensation within the double glazed unit.

There are a few spacer bars to choose from, we will start with the most popular,

Aluminium- Light but strong their flexibility means they can be formed into a wide variety of shapes and sizes. However, less effective in insulating against heat loss than warm edge spacer bars, these Aluminium spacer bars are the more cost effective of the spacer bars.

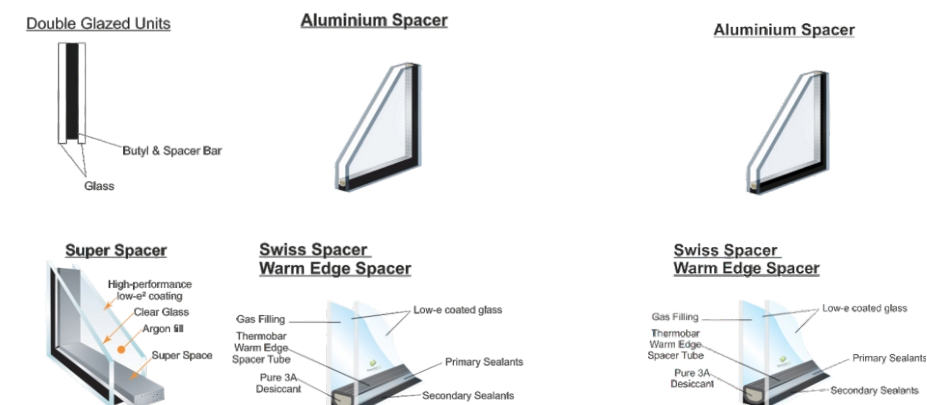

Warm edge spacer bar- otherwise known as thermal break, reduce the heat loss around the perimeter of a double glazed unit by replacing conventional aluminium with low heat conductive material, further reducing condensation on the room-facing surface of the double glazing window as they transmit less of a temperature difference to the interior plane. Usually made from a fibre-glass reinforced insulation material. An ultra-thin foil lining acts as a barrier to the gas or air trapped within the cavity.

These are available in a array of different colours.

Glass

Low E- Otherwise known as low-emissivity glass, with a transparent metallic coating that works in two ways to economise heating energy. The dual action coating reflects heat back into the room whilst allowing heat and light from the sun to pass through.

Pilkington K Glass™- A low-emissivity soft coated product which offers thermal insulation when incorporated within an insulating unit, with optimal solar heat gain, thermal insulation and light transmission to provide the highest window energy rating.

This page is here to help you with understanding double glazed units, otherwise known as insulated glazing.

There are lots of different options for double glazing to choose from depending on the customers requirements.

You will need to inform us the following-

What thickness unit they require.

What Spacer Bar they wish to use.

If the unit is to be Gas Filled

What type of glass they wish to use (example low e)

Below we will supply some useful instructive advice on how to acquire the above information for your own double glazed unit.

BESPOKE GLASS RESTORATION.

Over four decades Art Glass have accomplished many attractive glass pieces, mainly in the world of restoration. With the knowledge we've gained over the years of restoring both etched and coloured glass we have been able to adapt traditional techniques to recreate bespoke glass panels.

Every assignment we have had the pleasure of working on makes our job worthwhile.

Our bespoke service allows us to copy and reproduce designs using different techniques depending on the glass panels.
